

CURRICULUM VITAE

I am a Full Stack Engineer with hands-on experience delivering complex, production-ready applications for both corporate and freelance clients. Since completing my coding traineeship, I have built and deployed multiple real-world projects using a diverse tech stack, including PHP (Laravel), JavaScript/TypeScript, Vue.js, React Native, MySQL, SQL Server, and Firebase. My work spans from architecting and developing internal business platforms at 3P Logistics Ltd to creating the official mobile app for the Cayman Islands Football Association.

I have a proven ability to design and implement scalable, user-friendly systems — from backend architecture and API integrations to intuitive front-end interfaces. My diverse professional background, combined with my technical expertise, strengthens my adaptability, communication, and analytical thinking. I thrive in fast-paced environments, solving problems under pressure while collaborating effectively within teams or working independently. I am passionate about building impactful digital solutions and continuously advancing my skills to deliver value-driven technology.

CODING TRAINEESHIP

IT Career Switch Ltd
Coding Traineeship – Full Stack Developer
1-year program

During the traineeship, I had to demonstrate a very competent level of the following programming languages and technical skills:

- HTML5, CSS3, JavaScript
- PHP, SQL, React, jQuery
- Python, Node.js, Bootstrap
- Command line Git, Github
- Remote API access

PROFESSIONAL PORTFOLIO:

My complete portfolio, including corporate, freelance, and training projects, is available at <https://gisellejohnson.co.uk/>. It showcases real-world applications developed for employers, clients, and as part of professional training — covering full-stack web development, mobile app development, API integrations, database architecture, and UI/UX design. The portfolio highlights my work for **3P Logistics Ltd**, the **Cayman Islands Football Association**, and other projects built during my coding traineeship with IT Career Switch.

CAREER HISTORY:

April 2025 – Aug 2025
(Freelance)

Full Stack Mobile Developer – Cayman Islands Football Association

- Architected and developed the official cross-platform mobile app for CIFA, connecting fans, players, and administrators with local leagues and international competitions.
- Built React Native app (Expo) for iOS and Android with custom UI library inspired by Premier League design standards.
- Integrated Firebase backend (Firestore, Authentication, Cloud Storage, Cloud Messaging).
- Implemented role-based admin panel, real-time match updates, push notifications, news management, and league tables.
- Delivered as a solo developer, handling full-stack development, deployment, and stakeholder communication.

Tech Stack: React Native, Expo SDK 52, TypeScript, Redux Toolkit, Firebase, Expo Router with dynamic routing, Custom component library

Mar 2025 – Current

Full Stack Developer – 3P Logistics Ltd

- Lead full-stack development for internal platforms and customer-facing applications, delivering secure, scalable, and user-friendly solutions. Key projects include:
- Fusion Features Community Platform – Built interactive module for feature suggestions, voting, and discussion with moderation tools and gamification.
- Historic Stock Level Reporting – Developed stock history reports with date-based queries and user-friendly reporting interface.
- Reports Platform Security & Navigation Enhancements – Implemented access permissions, improved navigation with “Favorites” system, and optimised UX.
- Automated Stock Snapshot Backup – Created overnight SQL backup system with customer-facing reporting.
- Training Content & Tooltip System – Integrated in-page tooltips and training content linked to HubSpot and YouTube resources.
- React Native 3PL Door App – Independently built inbound processing mobile app with barcode scanning, image capture, and offline support.
- DPD Collection Request System – Developed self-serve booking with address validation, custom reference handling, and billing logging.
- Stock Level Notification System – Implemented global and SKU-level alerting with email and in-app notifications.

Tech Stack: PHP (Laravel), JavaScript/TypeScript, Vue.js, React Native, MySQL, SQL Server, REST APIs, GitLab CI/CD.

Apr 2024 – Jan 2025

Retraining

- During this time, I focused on completing the coding studies that I began in January 2024, and completed projects to gain practical experience with these technologies
